

**Sale Name:** ICEBREAKER FARM AND HEAVY EQUIPMENT AUCTION

**LOT 4 - NEW USER TIPS**

**Description**

Helpful tips on how to manage our bidding platform for user friendliness

Some things we have learned most people do not realize. There is a blue-ribbon banner near the top of the page with tabs that are very helpful!

Mobile Device-- if you are bidding from your phone, you will see more lot tiles if you turn your phone horizontal. This may give you a better view of closing lots.

Account--you can use this tab to change or update any of your information. Name--phone-email

Watchlist--each lot has a small eyeball icon-- click it and that item will appear in your watch list. This can really help condense the auction to all the items you have any interest in to avoid having to view thru over 1550 lots. If it's of any interest put it in your watch list.

Bidding On--shows you which items you are bidding on and the status.

If you are new to this bidding platform and haven't developed your bidding account -- that is step 1.

If you have a bidding account with this platform, you will still need to register for EACH auction using the same account login. Just register-- no need to develop another account.

Please try to write down or remember your login information--we can help recover, but it helps to record that for your records. You will need to Login before Bidding.

**Best Place to Bid in Real Time:** to stay up to date with the time and bidding status of the bids you place there are 2 spots you can bid from.

#1 **The Live Auction Catalog** will always keep the time, bidding information / status up to date in real time.

#2 **Your Watchlist** is another spot you can bid from that will keep the time, bidding information / status up to date and current.

**\*\*\*\*"Bidding On and Winning On -- DO NOT KEEP IN REAL TIME\*\*\*\*"**

**Please do not plan to bid from these pages when the Live Auction Begins!**

Refresh Bidding Site-- As you place bids the system will send out notifications to the email you provided, example "Bid Notice" "Auto Bid" "Out Bid" "Max Bid" just to name a few.

The link in these email notifications do not stay current with the constant movement of the auction. If you click on the link --- You will need to REFRESH the bidding site for the most current information to show.

Placing a Max Bid--A Max Bid is a convenient way to bid in an online auction. Placing a Max Bid allows you to enter the maximum amount you are willing to pay for an item and our auction software will automatically bid on your behalf, moving by the set increments ONLY as other bidders bid against your entered Max Bid. It will not exceed your max bid.

Soft Close-- If someone places a bid in the last few minutes of an auction lot closing, the end time for the specific lot is extended out 2 minutes.

Your invoice-- **At the end of the auction** --- in your bidding account --click on the word ACCOUNT tab---you will see another tab that says INVOICE--you can see your invoice there in case you do not receive an invoice in email.

Please Note: Items in Your Watchlist along with options Winning On and Bidding On will only remain in your bidding account for 24 hours after the close of auction.

Your INVOICE will stay available indefinitely.

Your status of WINNING or OUTBID status will also remain on the lots when you go back and search Past Auction Catalog.

We think you are awesome! You are making it thru the online bidding process like a rock star!
